

Town of Sharon
Recreation Department

Field Permitting System

Intent and Purpose

To establish proper use standards that will enhance the safety and enjoyment of the Town's outdoor facilities.

To create a master schedule of all users.

To forecast future needs for outdoor facilities.

To determine a maintenance program that allows for improvement and reconstruction with as little impact as possible on active use of the facilities.

To ensure that the Town is properly protected against claims arising from use of said facilities.

To distribute use in a fair and equitable manner.

Note:

Sharon outdoor facilities are in the public domain and do not necessarily need a permit for use. However, a legally issued permit does take preference over drop-in use on any site or playing surface.

Regular meetings of a group are considered organized use and require the issue of a Field Permit from the Sharon Recreation Department.
