- faucet aerators

### Outdoor Conservation

- lawn care
- garden care
- native plants
- irrigation systems
- irrigation contractors

### Rebates

- clothes washers
- toilets

### FREE Water Audits

### About Us

### HOME

Looking for help with your landscape? Review the list of landscape irrigation professionals partnering with EPA WaterSense! All too often, landscape irrigation wastes water—up to 1.5 billion gallons every day across the country. WaterSense irrigation partners can help you reduce your water consumption, save money, and maintain a beautiful landscape. These professionals are certified through WaterSense labeled programs for their expertise in water-efficient irrigation technology and techniques.

If homeowners with irrigation systems hired WaterSense irrigation partners to perform regular maintenance, each household could reduce water used for irrigation by 15 percent, or about 9,000 gallons annually—that's the amount of water that would flow from a garden hose if it was left running for almost a whole day. WaterSense irrigation partners also can help you design and install a new irrigation system or audit an existing one to minimize the amount of water you use, greening your yard in more ways than one.
