

sharon water works [1896 - 2022]

On November 21, 2022 the men and women of the Sharon Water Department were presented a plaque recognizing the efforts to preserve Station 1 that was built in 1896. This building is used today as the Lab and offices and garage of the Water Department. According to Eric Hooper, DPW Director of the Town of Sharon, the interior of this building is about to undergo some major renovations including uncovering two fantastic arched glass windows that were covered

up and painted over that date back to 1896-1897 era. Many thanks to these dedicated Water Professionals for continuing to deliver Safe Clean drinking water to the residents of the Town of Sharon, MA.
